Manipulating Images and Screen Shots: Moving the Image Around the Page

- In this tutorial you will learn how to move your image around the page.
- Moving the image allows you place the image anywhere in the document you need.

Moving an Image

For this tutorial, the image used is a screen shot of the MyWalden University Portal login in page.

Step 1: Click anywhere on your image. A four-way arrow will appear.

Step 2: While holding the mouse button down, click and drag your image to the desired location.

Finish: When your image is in the location you want, release the mouse button. Your image is now in a new location.
