NURS 6565: Synthesis in Advanced Practice of Patients in Primary Care Settings

Course Description

Students in this synthesis course will focus on clinical competence in primary care settings by building on knowledge and skills gained in previous courses. Through clinical practice, students will build confidence as they begin the transition from the role of registered nurse to advanced practice nurse. Classroom activities and case studies will enable students to explore the salient nurse practitioner practice issues involved in the delivery of safe, competent, quality and cost-effective care of patients in a dynamic healthcare system. Clinical experiences in primary care settings will provide students with the continued opportunity to develop, implement, and evaluate management plans for patients with complex health conditions. The application of knowledge in the management of clients and collaboration among the advanced practice nurse and the client, family, and interprofessional healthcare team are emphasized.

Credit & Practicum Hours

Quarter Credit Hours: 5 credits
- Didactic – 3 credits
- Practicum – 2 credits

Practicum Hours:
Students Enrolled Before Spring 2018: This course requires a minimum of 144 practicum hours.
Students Enrolled After Spring 2018: This course requires a minimum of 160 practicum hours.

Course Learning Outcomes

- Synthesize the role and responsibilities of the nurse practitioner
- Analyze issues related to the certification and licensing of nurse practitioners
- Summarize challenges that impact clinical practice for advanced practice nurse practitioners
- Analyze the evolving role of the advanced practice nurse practitioner
- Apply interprofessional practice in providing care to patients with complex health conditions
- Synthesize the process for transitioning from the role of registered nurse to advanced practice nurse practitioner
- Analyze ethical and legal issues of nurse practitioner practice
- Synthesize process for measuring quality performance of nurse practitioners

MSN Learning Outcomes

At the end of this program, students will be able to:
1. Synthesize organizational/systems leadership for cost-effective specialist nursing practice that contributes to high-quality healthcare delivery, advancement of the nursing profession, and social change.
2. Critique evidence-based literature drawing from diverse theoretical perspectives and pertinent research to guide decision making that demonstrates best practices for specialist nursing practice in a global society.
3. Integratively assess, diagnose, plan, implement, and evaluate cost-effective healthcare strategies that reduce health disparities by patient/population advocacy for access to specialist nursing care.
4. Demonstrate ability to effectively communicate using audience-specific oral, written, and information technology for professional delivery of specialist nursing care.
5. Evaluate health needs of diverse populations for necessary teaching/coaching functions based on specialist nursing knowledge to restore/promote health and prevent illness/injury.
6. Exhibit ongoing commitment to professional development and value of nursing theories/ethical principles (altruism, autonomy, human dignity, integrity, social justice) in accordance with ethically responsible, legally accountable, specialist nursing practice.
7. Implement specialist nursing roles to promote quality improvement of patient-centered care in accordance with professional practice standards that transform health outcomes for diverse populations.
